

# Everything You Need to Know About Our 'Feed The Needy' Cause

As a nonprofit organization, Auroveda Operating Foundation is a charitable trust. We are focused on empowering women and children in the underprivileged communities of India. Volunteers at Auroveda dedicate themselves to creating free healthcare opportunities while delivering free [vocational training](#) to unemployed youth, allowing them to carve their own paths. They also provide rehabilitation to refugees and foster community well-being among all.

## What We Do

We are devoted to paving the way for a brighter and richer future for those who are less fortunate. Food, shelter, and education are basic human needs that no one should have to do without. However, the reality is that there are many out there who are living in destitute conditions.

Auroveda strives to provide education and feed the hungry. We also aspire to make quality healthcare accessible to all by providing an environment of holistic well-being for the underprivileged and refugees in developing countries such as India.

India has been suffering from social, economic, and psychological issues for far too long now, and this is the narrative we are dedicated to changing. It is not just about providing resources, but it is about developing hope and assisting people in whichever way possible to turn it into a reality.

Our volunteers devote most of their time to building community and educational centers that provide vocational training. This is to educate the youth about their rights and the future they can build for themselves. With this center, we aim to promote leadership and empowerment amongst youngsters, especially women and children. The goal is to create a safe haven and a community of motivating people, pushing them to reach their full potential.

## **Feed The Needy**

Food and water are two of the most important and basic human necessities. Yet, there are thousands of families in India that struggle to access it. In an attempt to change this, Auroveda partnered with the IIP Foundation to feed the underprivileged. With an overwhelming philanthropic response, the '[Feed The Needy](#)' campaign effort was turned into a success story as we were able to provide groceries supplies lasting 45 days to over 5,000 families across the country. We were able to reach the needy families of West Bengal, Rajasthan, and Adarsh Nagar Delhi. This has been one of the many steps undertaken to help the needy in every way possible. Our volunteers are always ready on their feet to set out and make a difference for the underprivileged.

Established to bring about positive change in the lives of the underprivileged, [Auroveda](#) continues to touch the lives of those who need it the most. We often underestimate the power we hold to change the discourse of those less fortunate than ourselves and restore their dignity. If we set our minds to it, we can empower them to truly transform their current situation and build a brighter future.
